PROFILE SUMMARY

- Full Stack Developer with **over 7 years of experience**, specializing in **front-end-focused enterprise applications** using **Next.js, React.js, Angular CLI, and React Native**, delivering high-performance, scalable, and SEO-optimized web and mobile solutions.
- Strong back-end proficiency in **Python, Laravel, Node.js, Core PHP**, with hands-on expertise in **API design, authentication (OAuth/JWT), microservices, and database architecture (MySQL)** for data-driven applications.
- Proven track record of **leading cross-functional teams, mentoring developers, and establishing coding standards**, ensuring **end-to-end product delivery**, from architecture and development to deployment and post-launch support.
- Recognized for **innovative problem-solving, performance optimization, and reusable component development** (e.g., Rule Builder, E-sign Tool, DynoGrid, Form Kit), enhancing **developer productivity** and reducing delivery timelines.
- Experienced in **modernizing legacy systems, SEO optimization, Agile workflow, and project management**, consistently delivering **enterprise-grade projects 100% on time** while improving **user experience, scalability, and application responsiveness**.

CORE COMPETENCIES

- Front-end Architecture & Development
- React.js & Next.js Expertise
- Cross-Platform Mobile Development
- Backend API Design & Integration
- Database Design & Optimization
- Agile Project Management & Team Leadership
- Reusable Component & UI Library Development
- SEO & Web Performance Optimization
- Microservices & Scalable Application Design
- Troubleshooting & Technical Innovation

TECHNICAL SKILLS

- Front-end:** Next.js, React.js, Angular CLI, React Native, HTML5, CSS3, JavaScript, TypeScript
- Back-end:** Python, PHP (Laravel), Node.js
- Full Stack / API:** End-to-end development, REST API integration, MySQL database design, authentication (OAuth, JWT), microservices architecture
- Mobile Development:** React Native, Ionic
- Tools & Platforms:** Git, GitHub, GitLab, VS Code, Postman, Trello, Asana, Notion, Lighthouse, DBeaver, HeidiSQL

WORK EXPERIENCE

Team Leader / Full Stack Developer

Hridayamsoft Solutions Pvt. Ltd., Mumbai, India | Feb 2019 – Present

- Directed **front-end and full stack development** for web and mobile applications, major and critical projects including **Sharedocs Enterpriser** and **DMS Mobile App**, using **Next.js, React.js, React Native, Laravel, and Node.js**, delivering **high-performance, scalable, and responsive solutions**.
- Revamped CKYC**, migrating a legacy system to Next.js, enhancing **performance, responsiveness, and SEO compliance**.
- Designed and implemented **reusable components** such as **Rule Builder, E-sign Tool, and DynoGrid**, accelerating development timelines and improving team productivity.
- Optimized SEO** for corporate websites, remarkably boosting **organic traffic and search rankings**.
- Spearheaded **cross-functional teams**, enforcing coding standards, Agile workflow, and best practices, ensuring **timely delivery of enterprise-grade projects**.

MAJOR PROJECTS

- ShareDocs Enterpriser (Team Lead):** Architected and led front-end development of an AI-first modern ECM system. (Next.js)
- CKYC Revamp (Team Lead):** Led the revamp of the CKYC platform with a modular frontend redesign and optimized UI workflows and improved UI performance and operational throughput by 3x. (Next.js, MySQL)
- DMS Mobile App (Team Lead):** Developed mobile application for enterprise content workflow approvals and document access. Led frontend development and mobile UI architecture for optimized user experience. (React Native, Laravel, MySQL)
- CPAPP Mobile App (Team Lead):** Built an enterprise mobile application for workflow tracking, document approvals, and real-time notifications. Led cross-platform mobile development and API integration. (React Native)
- Aadhar Masking Tool (Team Lead):** Engineered a platform for bulk and single Aadhar masking, integrated manual/auto-detection APIs, and payment gateway. (Next.js)
- QB Tool (Team Member):** Developed modules for a multi-tenant Question Bank Management System, including dynamic question components, multi-stage approval workflows, role-based access control, and reporting dashboards. (Angular CLI)
- JUNO HRIS (Team Member):** Implemented an employee management system including rostering, onboarding, and performance tracking. (Laravel, SQL)

- **Asset Management Tool (Team Member):** Built a multi-tenant Fixed Asset Management System with role-based access, QR-enabled tracking, asset lifecycle workflows, audit trails, and analytics dashboards. (Next.js, PHP)
- **DMS Support Tool (Team Member):** Constructed a support tool for email/call management and master creation modules. (PHP, SQL)
- **Reusable Components:** Independently designed and developed reusable microservices and utility platforms including Notification Service, E-Sign PDF, Rule Engine, AI-based Face Validation, Redaction Tool, PDF Editor (AcroForm detection), Dynamic Grid Engine, and a JSON-driven React Form Builder, enabling scalable and configurable enterprise workflows across multiple products.

EDUCATION

- **Master of Computer Applications (MCA):** Yashwantrao Chavan Maharashtra Open University | 2022
- **Bachelor of Science in IT (B.Sc.- IT):** Mumbai University | 2018
